

## Environmental Protection Policy

---

The Management of Rogers Transport is committed to the pursuit of a better environment through the implementation of practices, procedures and facilities that will ensure efficient, effective and timely reductions in waste and emissions, in accordance with applicable laws and regulations.

Management shall:

- Identify and reduce the detrimental impact of all work related events on the environment
- Ensure all employees are adequately informed and trained to operate within the accepted guidelines and regulations
- Co-operate with Government and local bodies engaged in pollution abatement and environmental control
- Identify, quantify and control chemical and physical agents in the workforce.
- Establish and maintain a Spill Response Plan and reporting system applicable to all levels within the company
- Use vehicles, plant and equipment that meet Environmental Protection Standards.
- Ensure all waste disposal is carried out in accordance with accepted guidelines and procedures
- Respond quickly, responsibly and openly to any failure occurring within the company.

Rogers Transport encourages active participation in all Environmental Protection activities, and recognises that the ongoing pursuit of these will contribute many essential elements to a professional and profitable business.
